

Capital Hash House Harriers – Run 2037 - JR/Sue Ellen – ~~Dallas~~-Duffy Detour

A very good sized pack for this run, the GM was conspicuous by his absence and anarchy reigned again as the RA attempted to keep control. It was a night where most of the awards returned and many an injustice to the recipient occurred, I thought you all might have forgot what a magnificent GM I used to be, but alas there seems to be some long memories around.

Run Report – Toyboy commented that while the marks started off well it soon degenerated into a run that looked like it had been set on an electric bike (which it was). A score of .013 due to the amount of virgin territory.

Walk Report – All Day Sucker commented that it was the best walk he had ever trised?? Along. They had a map, which Gerbils managed to promptly show his lack of map reading skills. Sue Ellen as a co-hare wasn't much use as she didn't recognise where she was. Going through new territory in Wright was great as was the Drink Stop. A score of 6.5 (which was not challenged by the stand-in GM
